

## Spot Audit: indwelling urinary catheters

Personal & Clinical Care Standard 3.g.i (Aged care)

Questions:		Yes ✓	No ✗
1	Documentation - reason for Insertion is recorded		
2	Documentation - ease of insertion (i.e. no. of attempts) is recorded		
3	Documentation – size of catheter inserted is recorded		
4	Documentation – Long-term/permanent catheter change/ removal “due date” is recorded		
5	Catheter support in situ e.g. tape, leg bag straps		
6	Drainage bag less than 3/4 full		
7	Drainage bag is not touching the floor (floor is the dirtiest place in healthcare, bags should never be on the floor)		
8	Bag is below resident bladder		
9	Catheter & bag connections secure		
10	Catheter & tubing not kinked		
<b>% score for compliance -</b> $\frac{\text{total number of yes answers}}{\text{total number of yes and no answers}} \times 100 = \boxed{\phantom{00}} \%$
