It might be gloves. It's always hand hygiene.

SAVE LIVES: Clean your hands

WHY WASH HANDS?

- About 80% of infectious diseases are transmitted by unclean hands touching contaminated surfaces.
- Organisms left on surfaces can survive for minutes, hours, days and even weeks.
- Organisms multiply! A single bacterium can multiply into more than 16 million in 8 hours.
- Hands encounter around 10 million organisms per day.
- Humans have approx. 1,500 bacteria living on each square centimetre of skin on their hands. Underneath fingernails and between fingers can harbour even more.
- People touch their faces on average 23 times an hour, risking infection transmission to eyes, nose and mouth.
- Research shows that if everyone routinely washed their hands, a million deaths a year could be prevented.
- The most common microbial contaminants from hands in health care include skin commensals and pathogens -MRSA, CDI, VRE, E.coli.
- Unclean surfaces can harbour millions of organisms.
 Portable medical equipment is a significant source of transmission, as are computer keyboards. Mobile phones are a hazardous microbial platform, housing bacteria, fungi, protists, viruses and bacteriophages.

WHE

Before:

- Entering or leaving a healthcare facility, clinic or personal environment (older person's/ individual's room or home)
- Touching older person/ individual
- Handling medicines
- Preparing/eating food
- Touching your eyes, nose or mouth
- Donning gloves

After:

- Removing gloves
- Blowing your nose, coughing or sneezing
- Going to the toilet
- Touching animals and pets including therapy animals
- Assisting another person with toileting/personal hygiene

HOW TO HAND WASH

- 1. Wet hands with running water
- **2.** Soap your hands and lather up
- **3.** Rub all over your hands, between your fingers and thumbs for 20 seconds
- **4.** Rinse hands under running water
- **5.** Dry hands using paper towel

HOW TO HAND RUB

- **1.** Apply a small amount of ABHR to your palm
- **2.** Cover all surfaces of the hands and wrists
- **3.** Perform rotational rubbing of fingertips in the palm of the other hand
- **4.** Rotational rubbing of both thumbs
- 5. Rub hands until dry

THE 5 MOMENTS

- 1. **BEFORE** touching an older person/individual
- 2. BEFORE a procedure
- **3. AFTER** a procedure (or body fluid exposure)
- 4. AFTER touching an older person/individual
- **5. AFTER** touching an older person's/individual's surroundings
